

**RETURN TO NORMALCY**  
*LIFE UNPAUSED*

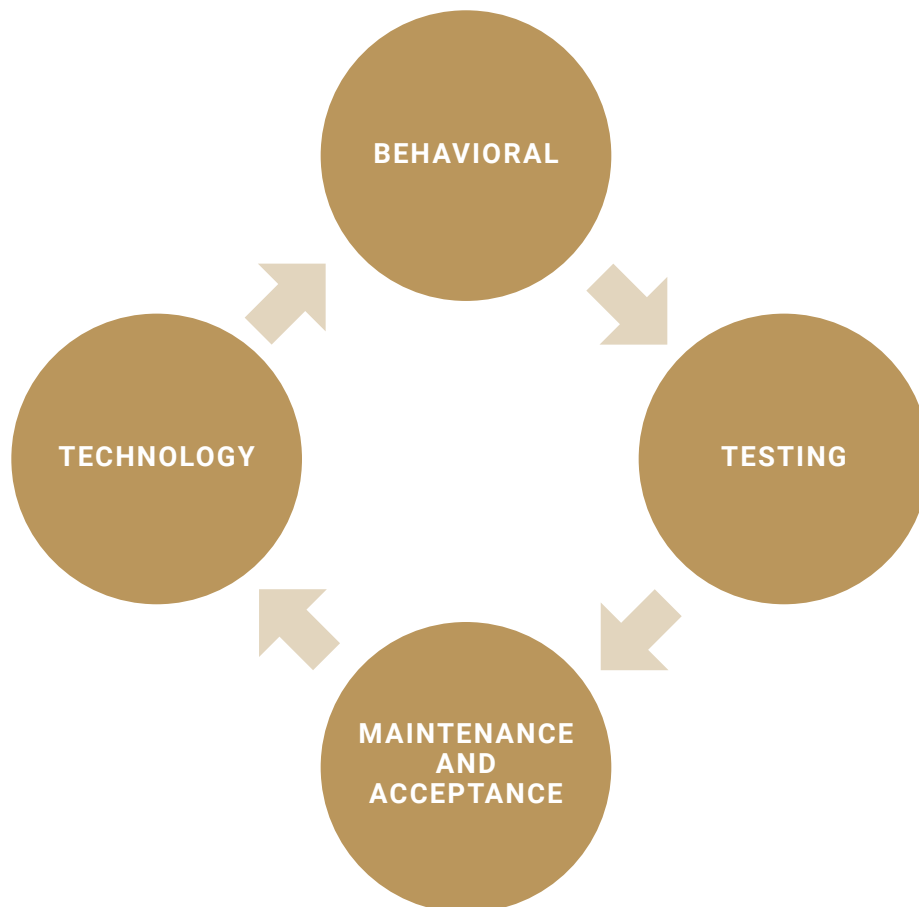

Affinity is a leading occupational health, population, and disease management life sciences organization that specializes in providing technology-based solutions and related supports for employee, individual, and insured members for services related to wellness endeavors. They have leveraged their 20+ years of experience providing these services to a variety of customers, including being a contract holder for the US Government, to become an international provider of COVID-19 Return to Normalcy services. The organizations using their services average around a 0.76% positivity rate as compared to national averages of 4-5% (n=25k). Affinity can help create a customized COVID-19 strategy that can not only provide testing, screening, and other related services, but can also address and support behavioral health initiatives and needs.

# AFFINITY COVID-19 SERVICES

Affinity provides international COVID-19 Return to Normalcy and related services. They provide a variety of COVID-19 related services, including:

- PCR testing
- Antibody Testing
- At home COVID-19 Testing
- Onsite and Mobile COVID-19 Testing and Screening
- Behavioral Health Screening and Supports
- Health Risk Assessments
- Vaccine Distribution
- COVID-19 Strategies
- COVID-19 Practices Compliance
- Fatigue Screening
- HIPAA compliant resulting and scheduling platform that also supports telehealth/video appointments
- Medical Authorization to Test

Additional services include: Occupational Health, Drug Free Workplace Programs, Medical Clearance DOT, FAA, OSHA, and other related programs. Please contact Affinity for further details.

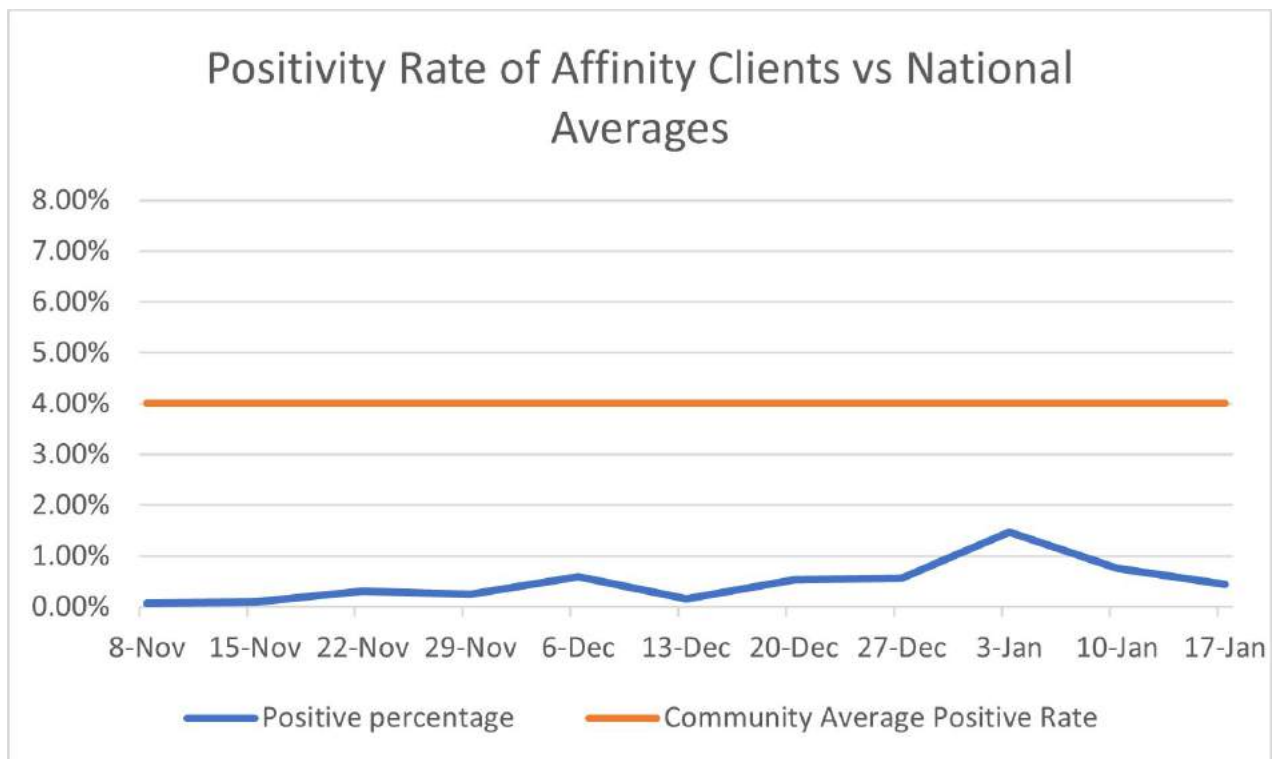

## EFFECTIVE COVID-19 STRATEGIES

These services are delivered internationally by a team of professionals that are staffed 24x7 to support your business need.

Employers using Affinity related services regularly for preventative screening in conjunction with other safety procedures to reduce the risk of COVID-19 transmission have averaged a YTD 0.76% positivity rate as compared to community averages of around 4% (n=25k).

# FAST TURN AROUND TIMES AND LOW RECOLLECTION RATES

Affinity provides services internationally. They contract with some of the top CLIA and CAP certified labs throughout the world to help provide reliable Turn Around Time (TAT). Throughout the US they average **18 hrs.** TAT for lab processed PCR tests. Although they can support testing throughout all of North America, locations that are close to labs can even see average TAT around 10 hrs. Internationally, their TAT is around 22 hrs.

In addition to TAT, another factor to consider is whether the samples collected might need to be recollected. As an industry average, roughly 3 to 5% of all samples typically have to be recollected in order to conclude in a definitive result. Through their experience with managing logistics and sourcing with high quality labs, **Affinity has a YTD recollection rate of just 0.27% (n=150k)**, which is reliable services our clients can depend on.

Affinity has lab partners in the following locations (note: only North America is listed. Affinity does have labs in India, Ireland, and South America - please contact Affinity for details):

- Atlanta
- Boston
- British Columbia
- Denver
- Hawaii
- Los Angeles
- New Orleans
- New York
- Philadelphia
- San Francisco
- San Diego
- Toronto

Affinity can support collections throughout all of North America.

# HIGHLY RATED CUSTOMER SERVICE AND FLEXIBLE SERVICES

Affinity can offer on-site collections that allow for true walk-up registration and consenting processes with real time medical authorization. Affinity can help empower their clients to manage testing events in a mostly self-supported fashion or can offer full service to help minimize the lift on behalf of the client. In most locations, Affinity can create mobile collection sites that can be truly temporary or semi-permanent collection sites. They offer real time support to their customers 24x7 with an average customer survey score of 4.6 out of 5.

Clients have access to the Assure® system, which is a HIPAA compliant population and results management technology platform that allows for scheduling, secure messaging, results reporting, consent management, video/telehealth appointments, assessment completion/scoring, and easy to use analytics.

The image displays two components of the Affinity service. The top portion is a screenshot of the Assure® dashboard, which features four main analytics panels: 'Orders by Clinic' (a donut chart showing 3,504 total orders), 'Orders by Division' (a bar chart showing counts for Staff, In-Person, Online, Consented, and Cancelled), 'Clinical Lab Diagnostic Tests' (a donut chart showing 91,750 total tests), and 'Outstanding Tests' (a bar chart showing counts for 178 tests, 88 tests, 20 tests, and 32 tests). A black arrow points from the text 'Dashboard Analytics' to the dashboard screenshot. The bottom portion is a screenshot of a telehealth video call in progress, showing a female healthcare professional with a stethoscope. A black arrow points from the text 'Telehealth Service' to this video call window.
